2. About Us Page

Our Story:

Forest Poultry Farming began long before the first chicken coop was built. It started with a young girl who developed a deep appreciation for nature as a system of balance, resilience, and growth – where life develops organically, responsibly and with intent.

From an early age, Puseletso showed a strong interest and passion in agriculture, initially through working with plants. That early exposure shaped a practical understanding of how quality food is produced and why working in harmony with the land matters. Growing up in a household where chicken was a staple, particularly because a family member could not consume other meats, she recognised the central role poultry plays in providing accessible, nutritious meals that bring people together.

Over time, this understanding evolved into a clear vision: to build a poultry business rooted in natural principles, guided by quality and nutrition, grown with intention, and committed to sustainable farming practices.

For Puseletso, poultry farming was never simply a commercial pursuit. It became an opportunity to build a business focused on long-term value, prioritising quality production, responsible land use, and consistency in output. Nature served as both a reference point and a benchmark, reinforcing the importance of balance, nourishment, and environmental responsibility.

Forest Poultry Farming was established on the belief that how chickens are farmed directly influences product quality. Every chicken reflects this approach: carefully farmed, organically grown, and produced using methods that protect the land, respect ecosystems, and support the health of the communities served.

The business began at home, with the simple intention of providing consistent, nutritious poultry for family consumption. While the beginnings were modest, the ambition has always been clear. Africa needs poultry producers that can scale responsibly, delivering high-quality, appetising products while maintaining sustainable practices.

Forest Poultry Farming is focused on growing into one of Africa's leading poultry producers without compromising the principles that define the brand. At its core, the business remains committed to balanced farming, responsible growth, and building a poultry operation designed for long-term resilience, trust, and value.

At its heart, Forest Poultry Farming is committed to farming the way nature teaches us – with balance, resilience, respect for life, and care for the planet.

We believe that:

- Goodness comes from purity.
- Healthy chickens create healthy homes.
- Nature knows the way.
- Nourishment should be part of every meal.

Forest Poultry Farming is more than farming. It is purpose-led agriculture.

Our mission (choose one of the three):

1. Our mission is to grow a nature-rooted poultry brand that delivers exceptional quality while advancing sustainable farming and nourishing the communities we serve.
2. Our mission is to build a sustainable, high-capacity poultry operation that expands from South Africa into regional and global markets.
3. Our mission is to build a modern, sustainable poultry enterprise grounded in nature, driven by quality, and designed for scalable growth into regional and international markets

Our Values

Nature First – We farm poultry with respect for the land and natural processes.

Quality Always – Freshness, cleanliness, and care in every step.

Community Growth – Nourishing families and creating opportunities.

Purpose-Driven – Built from passion, vision, and an unwavering belief in future expansion.

4. Branding:

Slogan Ideas

Pure Chicken. Pure Living. (Easy for consumers and packaging)

Brand Story Inspired - *From the Forest to Your Table.*

(This has a direct link between your brand name, founder story, and final product.)

Aesthetic moodboard for FPF

- To be used on the website, logo, social media, packaging, and investor pitch.

Color Palette

- Forest Green (#228B22) - Symbolises nature, grounding, calm, purity, stability.
- Lighter Golden Yellow (#FFEB66) - Represents sunlight, warmth, poultry, nourishment.
- Sky White (#F4F8F2) - Cleanliness, breath, purity, freshness.
- Soft Grey (#C7CFC8) - Professional balance; modern farm (I can't say for sure if this was used in the logos).

Photography Style

Images should communicate:

- Clean farmland
- Air, breath, open sky
- Freshness
- Healthy chickens
- Clean hands + natural environment
- Greenery around production areas

Style:

- Soft natural lighting
- Neutral earth tones
- Depth and calmness
- Minimal clutter

NO heavy industrial metal cages in imagery.

Use open-space poultry visuals (even staged/stock images) to match brand feeling.

Typography (font style)

Primary Font:

- Calm, rounded edges Modern serif

(I suspect this is the font. Verify this with your designer and ask them to share this information.)

Packaging message:

Premium, natural, grounded, organic.

Brand energy:

If Forest Poultry were a feeling, it would be:

- Quite confidence
- Purpose-driven growth
- Modern African farming
- Clean, premium quality

Brand positioning mood

This mood board positions FPF as the bridge between: Traditional natural farming and High-growth commercial poultry enterprise.

FPF visual identity should feel like:

A nature-inspired, grounded, premium African poultry brand
